

## Calculation Policy – Progression in Calculations

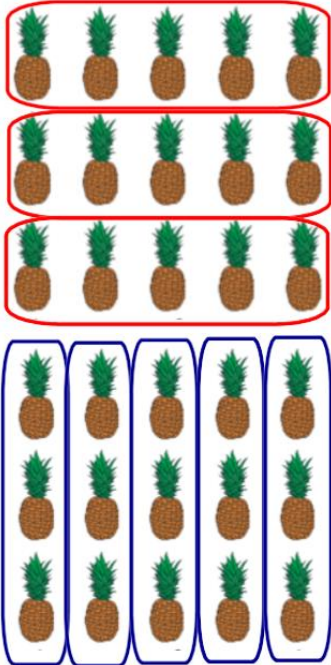

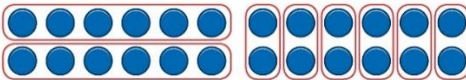

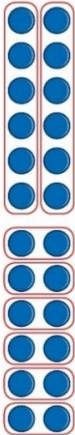

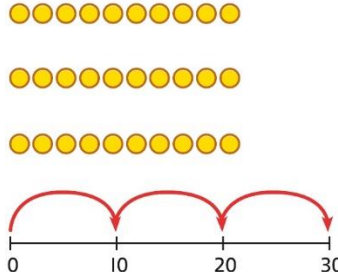

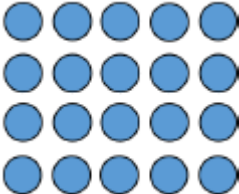

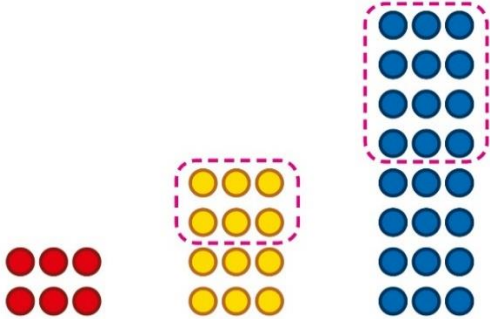

### Progression in Calculations - Multiplication

Expected Year Group	Objectives	Concrete	Pictorial	Abstract												
EYFS & Year 1	Counting in 2s and doubling	<p>Physical and real-life examples that encourage children to see the concept of doubling as adding two equal groups.</p> <p>Songs to help the learning of counting in 2s.</p> <div></div> <div></div> <div></div>	<p>Pictures that encourage the children to see the concept of doubling as adding two equal groups.</p> <div><div><div>What is double 4?</div><div></div></div><div></div><div></div></div>	<p>If appropriate, begin to introduce written addition calculations for adding two equal groups.</p> <table><tr><td>1+1=</td><td>7+7=</td></tr><tr><td>2+2=</td><td>8+8=</td></tr><tr><td>3+3=</td><td>9+9=</td></tr><tr><td>4+4=</td><td>10+10=</td></tr><tr><td>5+5=</td><td>11+11=</td></tr><tr><td>6+6=</td><td>12+12=</td></tr></table> <p>Year 1 – partition a number and then double each part before recombining it back together.</p> <div></div>	1+1=	7+7=	2+2=	8+8=	3+3=	9+9=	4+4=	10+10=	5+5=	11+11=	6+6=	12+12=
1+1=	7+7=															
2+2=	8+8=															
3+3=	9+9=															
4+4=	10+10=															
5+5=	11+11=															
6+6=	12+12=															

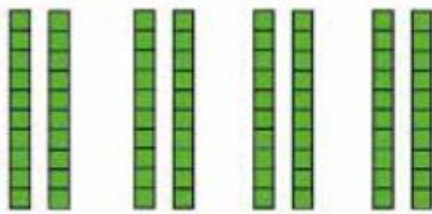

Year 1	Recognising and making equal groups.	<p>Using practical equipment to make groups of the same size.</p> 	<p>Drawing pictures to represent equal groups or make finding equal groups more efficient.</p> 	<p>Describe equal groups using words:</p> <p><b>Three equal groups of 4.</b> <b>Four equal groups of 3.</b></p> <p>If appropriate, beginning to record this information using repeated addition.</p> $5 + 5 + 5 + 5 = 20$ $2 + 2 + 2 = 6$
Year 1	Counting in 2s, 5s, 10s	<p>Using practical equipment to make groups of 2, 5 or 10. Also, using songs to reinforce patterns.</p> 	<p>Using number squares and number lines to identify patterns.</p> 	<p>Beginning to record this information using numerals. If appropriate, introducing the 'x' sign.</p> <p><b>2, 4, 6, 8, 10, 12 etc</b></p> $1 \times 2 = 2$ $2 \times 2 = 4$ $3 \times 2 = 6$ <p><b>5, 10, 15, 20, 25 etc</b></p> $1 \times 5 = 5$ $2 \times 5 = 10$ $3 \times 5 = 15$ <p><b>10, 20, 30, 40, 50 etc</b></p> $1 \times 10 = 10$ $2 \times 10 = 20$ $3 \times 10 = 30$

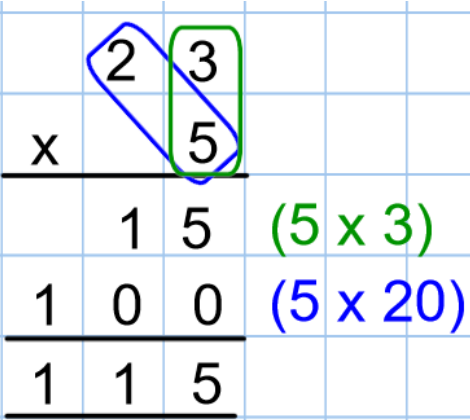

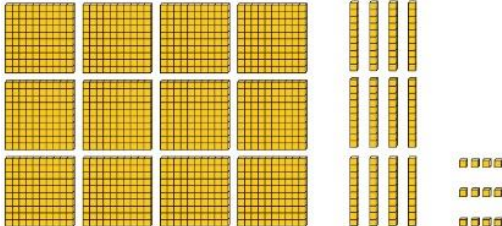

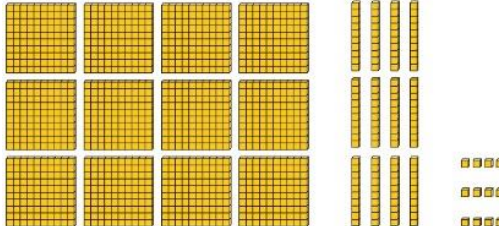

Year 1 & Year 2	Repeated addition	<p>Physically showing the addition of equal groups and how this can be worded using the language 'lots of'.</p>  <p><b>2 lots of 5 is 10</b></p>  <p><b>4 lots of 2 is 8</b></p>  <p><b>4 lots of 5 is 20</b></p>	<p>Pictorial representations alongside numerals.</p>  <p><b><math>5 + 5 + 5 + 5 = 20</math></b> <b>4 lots of 5 = 20</b></p>	<p>Beginning to record and show the link between addition statements and simple multiplications.</p> <p><b><math>5 + 5 + 5 + 5 = 20</math></b> <b><math>4 \times 5 = 20</math></b> <b><math>5 \times 4 = 20</math></b></p> <p>Using a number line to support where needed.</p>  <p><b><math>5 + 5 + 5 = 15</math></b> <b><math>3 \times 5 = 15</math></b></p>
Year 1 & Year 2	Recognising and using arrays	<p>Use objects laid out in arrays to find the answers to 2 lots of 3, 3 lots of 5 etc.</p>  	<p>Use dots laid out in arrays to find the answers to 4 lots of 5 etc.</p> 	<p>Linking arrays to the use of the multiplication sign.</p>  <p><b><math>4 \times 5 = 20</math></b></p>

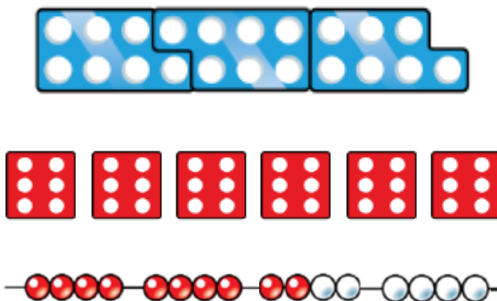

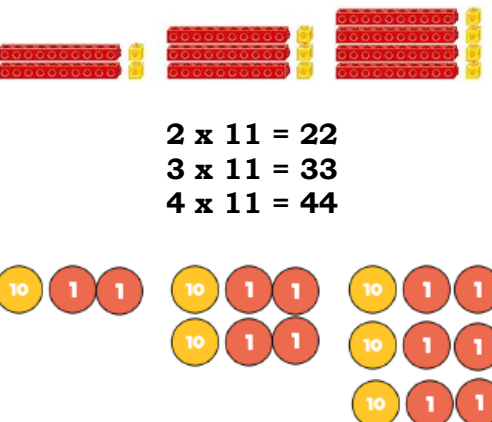

Year 2	Understanding commutativity	<p>Using arrays to demonstrate commutativity.</p>  <p><b>I can see 3 groups of 5. I can also see 5 groups of 3.</b></p>	<p>Create arrays using counters or dots to visualise commutativity.</p>  <p><b>There are 2 groups of 6 and also 6 groups of 2.</b></p> <p>Rotate the array to show that orientation does not change the multiplication.</p> 	<p>Use arrays to visualise commutativity and support this with numerals to show repeated addition and use of the 'x' sign if appropriate.</p>  <p><b><math>4 + 4 + 4 + 4 + 4 = 20</math>  <math>5 + 5 + 5 + 5 = 20</math>  <math>4 \times 5 = 20</math> and <math>5 \times 4 = 20</math></b></p>
Year 2	Learning $\times 2$ , $\times 5$ and $\times 10$ table facts	<p>Understand how to unitise groups of 2, 5 and 10 and learn the corresponding times table facts (with apparatus as required).</p> <p><b>4 groups of 10 ... 10, 20, 30, 40</b>  <b><math>4 \times 10 = 40</math></b></p> 	<p>Relate counting in unitised groups and repeated addition with knowing key times table facts.</p>  <p><b><math>10 + 10 + 10 = 30</math>  <math>3 \times 10 = 30</math></b></p>	<p>Understand how the times tables increase and contain patterns.</p> <p><b><math>1 \times 10 = 10</math>  <math>2 \times 10 = 20</math>  <math>3 \times 10 = 30</math>  <math>4 \times 10 = 40</math>  <math>5 \times 10 = 50</math></b></p>

Year 2	Using the inverse (taught alongside division)	<p>Using apparatus to show the link between multiplication and division facts.</p>  <p><b>4 lots of 5 is 20.</b> <b>20 shared between 4 is 5.</b></p> <p><math>4 \times 5 = 20</math> <math>20 \div 4 = 5</math></p>	<p>Using arrays to generate multiplication and division facts.</p>  <p><math>5 \times 4 = 20</math> <math>4 \times 5 = 20</math> <math>20 \div 4 = 5</math> <math>20 \div 5 = 4</math></p>	<p>Finding and writing related number facts.</p> <p><b>Can you find all 8 fact family sentences?</b></p> <p><b>2    4    8</b></p> <p><math>2 \times 4 = 8</math> <math>4 \times 2 = 8</math> <math>8 \div 4 = 2</math> <math>8 \div 2 = 4</math> <math>8 = 2 \times 4</math> <math>8 = 4 \times 2</math> <math>2 = 8 \div 4</math> <math>4 = 8 \div 2</math></p>
Year 3	Understanding and using $\times 3$ , $\times 6$ , $\times 2$ , $\times 4$ and $\times 8$ tables.	<p>Physically showing the addition of equal groups and how this can be worded using the language 'lots of', 'sets of' or 'groups of'.</p>  <p><b>There are 3 lots of 4 pens.</b> <math>3 \times 4 = 12</math></p>  <p><b>There are 6 groups of 4 pens.</b> <math>6 \times 4 = 24</math></p>	<p>Children understand how the <math>\times 2</math>, <math>\times 4</math> and <math>\times 8</math> tables are related through repeated doubling. Similarly, with the <math>\times 3</math> and <math>\times 6</math> tables.</p>  <p><math>3 \times 2 = 6</math>      <math>3 \times 4 = 12</math>      <math>3 \times 8 = 24</math></p>	<p>Children understand the relationship between related multiplication and division facts within the tables that they know.</p> 

Year 3	Using known facts to multiply 10s, for example $3 \times 40$	<p>Explore the relationship between known times tables and multiples of 10 using place value equipment.</p> <p>Make 4 groups of 3 ones.</p> <p></p> <p>Make 4 groups of 3 tens.</p> <p></p> <p><b>What is the same?</b> <b>What is different?</b></p>	<p>Explore the relationship between known times tables and multiples of 10 using pictures if needed.</p> <p></p> <p><math>4 \times 2 = 8</math> <math>4 \times 20 = 80</math></p>	<p>Understand how to use known times-tables to multiply multiples of 10.</p> <p><math>8 \times 4 = 32</math> <math>80 \times 4 = 320</math></p>																																										
Year 3	Multiplying a 2-digit number by a 1-digit number using the grid method	<p>Introduce the children to the grid method using base-10 equipment.</p> <table><tr><th>T</th><th>O</th></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr></table> <p><math>23 \times 3</math> means I have 3 groups of 20 and 3 groups of 3. Altogether, I have 6 tens and 9 ones which is 69.</p>	T	O													<p>Use pictorial representations to move away from manipulatives. Showing how the calculation can be partitioned and then re-joined to get the total.</p> <table><tr><th>T</th><th>O</th></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr></table> <table><tr><th>T</th><th>O</th></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr></table> <p><math>3 \times 4 = 12</math> <math>3 \times 20 = 60</math> <math>60 + 12 = 72</math> So, <math>3 \times 24 = 72</math></p>	T	O									T	O									<p>Using the grid method to partition but without the pictorial element.</p> <table><tr><td>X</td><td>10</td><td>3</td><td></td></tr><tr><td>8</td><td>80</td><td>24</td><td>= 104</td></tr></table>	X	10	3		8	80	24	= 104

+	1	5	0		(5 x 30)																																																									
	1	7	0																																																											
Year 4	Multiplying by multiples of 10 and 100	<div>Use place value equipment to understand how to multiply by multiples of 10 and 100.</div> <div><div><math display="block">3 \times 4 \text{ ones} = 12 \text{ ones} = 12</math><math display="block">3 \times 4 \text{ tens} = 12 \text{ tens} = 120</math><math display="block">3 \times 4 \text{ hundreds} = 12 \text{ hundreds} = 1200</math></div></div> <div><div>Use pictorial representations instead of physical manipulatives.</div><div><div><math display="block">3 \times 4 = 12</math><math display="block">3 \times 40 = 120</math><math display="block">3 \times 400 = 1,200</math></div></div></div> <div><div>Use known facts and their understanding of commutativity to multiply mentally.</div><div><math display="block">4 \times 8 = 32</math><math display="block">4 \times 80 = 320</math><math display="block">40 \times 8 = 320</math><math display="block">4 \times 800 = 3,200</math><math display="block">400 \times 8 = 3,200</math><math display="block">40 \times 80 = 3,200</math></div></div>																																																												

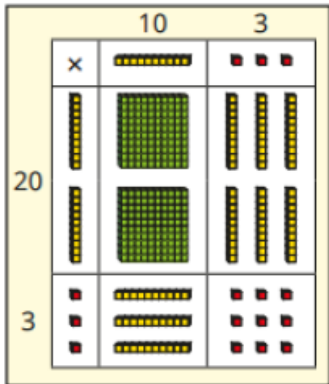

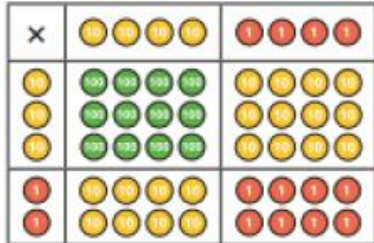

Year 4	Understanding times-tables up to $12 \times 12$	Using a range of apparatus to represent and understand different times tables. 	Representing a range of times tables using efficient pictorial representations.  $2 \times 11 = 22$ $3 \times 11 = 33$ $4 \times 11 = 44$ $1 \times 12 = 12$ $2 \times 12 = 24$ $3 \times 12 = 36$	Looking for patterns within times tables and using known tables to support the learning of others, for example using the 6 times table to find the 12 times table. <table border="1" data-bbox="1619 252 2114 363"><tr><td>9</td><td>18</td><td>27</td><td>36</td><td>45</td></tr><tr><td>54</td><td>63</td><td>72</td><td>81</td><td>90</td></tr></table> <table border="1" data-bbox="1619 413 2114 572"><tr><td>6</td><td>12</td><td>18</td><td>24</td><td>30</td></tr><tr><td>36</td><td>42</td><td>48</td><td>54</td><td>60</td></tr><tr><td>66</td><td>72</td><td>78</td><td>84</td><td>90</td></tr></table> <b>If <math>4 \times 6 = 24</math> then <math>4 \times 12</math> is double this which is 48.</b>	9	18	27	36	45	54	63	72	81	90	6	12	18	24	30	36	42	48	54	60	66	72	78	84	90

 160 \quad (4 \times 40) \\
 800 \quad (4 \times 200) \\
 \hline
 980
 \end{array}$$

Year 5	Multiplying up to 4-digit numbers by a single digit	<i>See year 4 (Column multiplication for 2-digit and 3-digit numbers multiplied by a single digit) but expand to include thousands too.</i>														
Year 5	Multiplying 2-digit numbers by 2-digit numbers	Use base 10 to show how the calculation can be broken down. 	Pictorial representations used to show the stages alongside a grid method representation. 	Once the children are secure with the stages, they can use the grid method without pictorial representations alongside or start to use the expanded multiplication method. <table><tr><td>X</td><td>20</td><td>3</td><td></td></tr><tr><td>20</td><td>400</td><td>60</td><td></td></tr><tr><td>8</td><td>160</td><td>24</td><td>= 644</td></tr></table>	X	20	3		20	400	60		8	160	24	= 644
X	20	3														
20	400	60														
8	160	24	= 644													

Use place value counters to show how the calculation can be broken down.

×	40	4
30	1,200	120
2	80	8

$$\begin{array}{r}
 52 \\
 \times 17 \\
 \hline
 14 \quad (2 \times 7) \\
 20 \quad (2 \times 10) \\
 350 \quad (50 \times 7) \\
 500 \quad (50 \times 10) \\
 \hline
 884
 \end{array}$$

Year 5 &  
Year 6

Multiplying up  
to 4-digits by 2-  
digits

Place value counters can be used alongside the pictorial and abstract representations however this may over complicate things now.

Use of the grid method alongside the expanded partitioning method if still appropriate however discussion may be had with the children about the inefficiency of this method for larger calculations and the need to move to a more formal method.

	100	40	3
10			
2			

$$\begin{array}{r}
 \text{Th H T O} \\
 1 \ 0 \ 0 \ 0 \\
 4 \ 0 \ 0 \\
 2 \ 0 \ 0 \\
 8 \ 0 \\
 3 \ 0 \\
 + \quad \quad 6 \\
 \hline
 1 \ 7 \ 1 \ 6 \\
 \hline
 1
 \end{array}$$

Children using the formal layout with the multiplication sentences written next to each part to begin with to show we are multiplying by the ones and multiplying by the tens.

			1	2	3
	x			2	3
			3	6	9
			2	4	6

(123 × 3)

(123 × 20)

$$\begin{array}{l}
 (123 \times 3) \\
 (123 \times 20)
 \end{array}$$

Discussions had about why the second answer line starts with a zero as a place holder (because we are multiplying by 2 x 10 not 2).

Year 6

Multiplying up  
to 4-digits by 2-  
digits

Children should now be able to use  
the formal method for long  
multiplication, remembering the  
stages needed.

			3	2	4	2	
	x				2	1	
			3	2	4	2	
		6	4	8	4	0
